SUMMARY

"Passionate MERN stack developer and AI/Web enthusiast, currently pursuing MCA dedicated to building scalable web applications and crafting robust backend solutions. Equipped with hands-on project experience and eager to contribute to a dynamic development team."

SKILLS SUMMARY

- | | |
|---------------------|--|
| • Frontend | React.js, Redux, React Router, TypeScript, JavaScript, Tailwind CSS |
| • Backend | Node.js, Express.js |
| • Databases | MongoDB, MySQL, PostgreSQL |
| • Tools | Git, GitHub |
| • Soft Skill | Problem-Solving , Communication , Creativity , Collaboration-teamwork , Event Management |

WORK EXPERIENCE

Boost Engine /6 month

Nov 2024 - May 2025

- Played a key role in designing and developing scalable MERN-stack web applications, improving overall system performance by approximately 18% through API optimization and efficient database queries.
- Collaborated with a cross-functional team using GitHub for version control.
- Designed and developed a high-quality static website for Boost Engine,
- Delivered dynamic, responsive UI components that improved page load speed by 15% .

Talentrise Technokrate /6 month

Jan 2026 - Present

- Developed and maintained scalable RESTful APIs using Node.js and Express.js, improving API response time by approximately 15% through optimized server-side logic
- Collaborated closely with the frontend development team to integrate APIs, resolve data-related issues, and ensure seamless communication between client and server.
- Implemented secure JWT-based authentication and authorization system, protecting routes and ensuring role-based access control within the application.
- Handled error management and input validation to improve application reliability

PROJECTS

Treandoura | [Link](#)

Feb-2024

- Built Treandoura, a full-stack MERN e-commerce clothing website with responsive UI, secure authentication, and smooth cart/checkout features
- Developed optimized REST APIs and MongoDB queries, improving performance by 25%.
- Created an admin dashboard for product, inventory, and order management to streamline backend operations.

Learning Management System (LMS) | [Link](#)

Jun-2025

- The Learning Management System (LMS) is a full-stack web application built using the MERN stack (MongoDB, Express.js, React.js, Node.js). It allows users to register, log in, enroll in courses, and track their learning progress.
- The system includes admin functionality to create and manage courses and users. Secure authentication is implemented using JWT-based cookies, and Redux Toolkit Query is used for efficient state and API management. The platform is fully responsive and designed for a smooth and engaging user experience.

Banking Backend System| [Link](#)

Feb-2026

- Designed and developed a real-world banking backend system using Node.js and Express.js, following modular and scalable architecture principles.
- Implemented secure user authentication and authorization mechanisms to ensure protected access to banking operations.
- Built core banking features including account creation, account management, deposits, withdrawals, and fund transfers.
- Applied proper validation, middleware, and error-handling strategies to ensure secure and reliable backend performance.

EDUCATION

Master of Computer Applications (MCA)

2024 – Present

Bachelor of Computer Applications (BCA)

CGPA 64.17 | 2021 – 2024

ACHIEVEMENTS

iT ignite 2023

Dec'23

Won Second Price in Web Design & Development
Competition of IT ignite 2023 program of Saraswati College

CERTIFICATES
